- 2. Read each questions carefully and follow the instructions.**

PART: A (15 marks)
READING

A1.Read the following passage carefully and answer the questions choosing the most appropriate option.

5x1=5

Exploring the Solar System

The solar system is a fascinating place with the Sun at its center and eight planets orbiting around it. Each planet has its own unique characteristics and features. Mercury, the closest planet to the Sun, is rocky and barren, while Venus is covered in thick clouds and has a scorching hot surface. Earth, our home planet, is known for its abundant water and diverse life forms. Mars, often called the "Red Planet," has a thin atmosphere and polar ice caps. Jupiter is the largest planet in the solar system and is known for its Great Red Spot, a massive storm. Saturn is famous for its beautiful rings made of ice and rock particles. Uranus and Neptune are icy giants located farthest from the Sun. Exploring the solar system offers endless opportunities for discovery and understanding of our cosmic neighborhood.
